

## Chapter V

# SUMMARY, AND FINDINGS

---

### 5.1 SUMMARY

The present chapter is an attempt to provide a summary of the entire study which has already been reported in the previous chapter. It consist of a brief outlines of the objectives, methodologies and procedure followed at different stages of the study and conclusion drawn in the light of the facts observed at the time of conducting the study and findings obtained after analysing the data. Different aspects of the study are briefly described in a summarised.

### 5.2 STATEMENT OF THE PROBLEM

“Study of Opinions of Teachers on Changes in Teaching Learning Process during COVID-19 pandemic”.

### 5.3 OBJECTIVES OF THE STUDY

The following are the objectives of the study:

- To find out percentage of the attitude of school teachers towards technology in teaching-learning process during COVID-19 pandemic.
- To find out percentage of the attitude of school teachers towards change in teaching-learning process during COVID-19 pandemic.

### 5.4 FINDINGS

It has been found that most of the teachers attitude towards technology have positive. It has also been found that in majority male teachers are accepting technology in dedicated manner than female teachers.

It has been found that very less teachers attitude towards change have positive. It has also been found that in majority of them in both male and female teachers are having moderate attitude towards change.

It has also been found that not a single teacher have negative attitude towards change and technology. It shows a good sign about teacher's attitude that they are prepared enough tackle and accept any changes in teaching-learning process. They are ready update themselves according to need.
