4. The statements consist of likert scale in which you have to select one option only for each question .
5. All the information provided by you will be confidential.
6. The information provided you will be used for research purpose only.

7. **SA: Strongly Agree** 

A: Agree 

N: Neutral 

DA: Disagree 

SDA: Strongly Disagree 

SI No	Statements	SA 	A 	N 	DA 	SDA 
1	Teacher training should include instructional applications of information communication technology(ICT).					
2	ICT has controlled factors of environment.					
3	I like using the computer to create power point presentations, graphics, picture, etc for teaching.					
4	I believe that using various appropriate technological environments could avoid waste of time in teaching learning process.					
5	Using technological tools will affect students motivation.					
6	It is easier to learn when my teacher uses the computer or other technology to teach.					
7	I dislike working with machines that are smarter than I am.					
8	Technology can allow me to do more interesting and imaginative work.					
9	I don't feel confident about using ICT as a teaching aid.					
10	On the Internet, one could reach unlimited information on any subject.					
11	I think ICT cannot improve the quality of students learning.					
12	OHP(Over Head Projector), slides and projection should not be preferred as they take too much time to be used.					
13	Technological facilities have a positive effect on learning.					
14	ICT has no impact on student success.					
15	Using current technologies would promote the improvement of new ones.					
16	A life full of technology may affect an individual in a negative way.					
17	Using ICT will assist in developing the independent learning skills of pupils.					
18	I think ICT has limitation to the creativity of students in learning process.					
19	ICT will make significant changes to teaching pupil relationships.					
20	I think the importance of ICT has been greatly exaggerated.
