## Environment attitude scale

Name .....

Age .....

School/University .....  
.....

Class .....

Father/Parent occupation .....  
.....

### Instruction

Environment related some statement is given in this scale. Three option “Agree” “Don’t know” and “Disagree” written along with every statement. If you are agree with statement then check mark in the box of agrees. If you do not know about statement then check mark in the box of don’t know. If you are disagreeing with statement then check mark in the box of disagree.

**Try to complete quickly this questionnaire as per as possible**

Raw score	Percentile	Grading of attitude

Sr No	Statement	Agree	Do not know	Disagree
1	The problem of pollution is due to uncontrolled abuse of environment			
2	Industrialization of the urban area is the main cause of water pollution			
3	The polluted water is the main cause of transmission of various diseases			
4	Environment is highly affected by high radiated light			
5	In present due to pollution, water is main agent for causing death			
6	The changes in physicochemical and biological condition of air are harmful for life			
7	"Chipko movement" is one of the good examples for the forest conservation, led by human community			
8	Establishment of industrial factories in urban areas are the main cause of air pollution			
9	The percentage of Oxygen in air is decreasing due to increase in CO <sub>2</sub> in the environment			
10	The various gases in the air are main cause of many health related disease			
11	Noise pollution is also a type of problem			
12	It is our duty to provide peaceful environment along with sustainable life to the next generation			
13	The conduction of tour can be helpful to children's for understanding the importance of the environment			
14	The environment is affected by loud sound			
15	Forest are helpful in maintenance of the natural balances			
16	The fertility of land can be increased by forest			
17	Deforestation is responsible for imbalance of the environment			
18	Deforestation are the main causes of various natural disaster like flood, environment pollution etc			
19	The rate of deforestation will be the cause of extinction human race			
20	The human being are main factor for affecting the forest by deforestation			
21	Forest is not a group of trees, it is a live unit. This understanding is the base of forest conservation.			
22	Artificial perfumes are exploiting the environment			
23	Plantation can reduce the air pollution			
24	Uses of improper way of ore extractions are also responsible for imbalance of environment			

Sr No	Statement	Agree	Do not know	Disagree
25	Environmental problems are increased due to urbanization			
26	The increase in number of houses causes increase in pollution			
27	Poor situation of environment is proved by our continuous ignorance towards the environment			
28	The present growth had been paid by us buy causing many environment problems .			
29	The environmental imbalance can be balanced by chemical discoveries

40	Loud sound by a large no people is the reason of pollution			

D- 332

## Observation Schedule

Time	Activities	Days		
		I	II	III
		Yes/No	Yes/No	Yes/No
<b>Morning session</b>	Proper cleanup			
	Wearing neat and clean school dress			
	Nail cutting properly			
	Wearing clean shocks and policed shoe			
<b>Lunch session</b>	Hand wash before lunch			
	Select clean space for sitting			
	Maintain hygiene during taking lunch			
	Hand wash after taking lunch			
	Use dustbin for waste disposal			
	Hand wash after using toilet			
	Plucking flower			
	Uses of polybags			
	Dumping of polybags in dustbins			
	Dirty that place where they were sitting during lunch time			
Dirty that place where water cooler was situated				
<b>Post lunch session</b>	Throwing garbage in the classroom or corridor of campus			
	Dirty school dress			
	Eating snacks and fast-food after school time in unhygienic place
