

CHAPTER-III

METHODOLOGY

CHAPTER-III

RESEARCH METHODOLOGY

B.1.0 INTRODUCTION

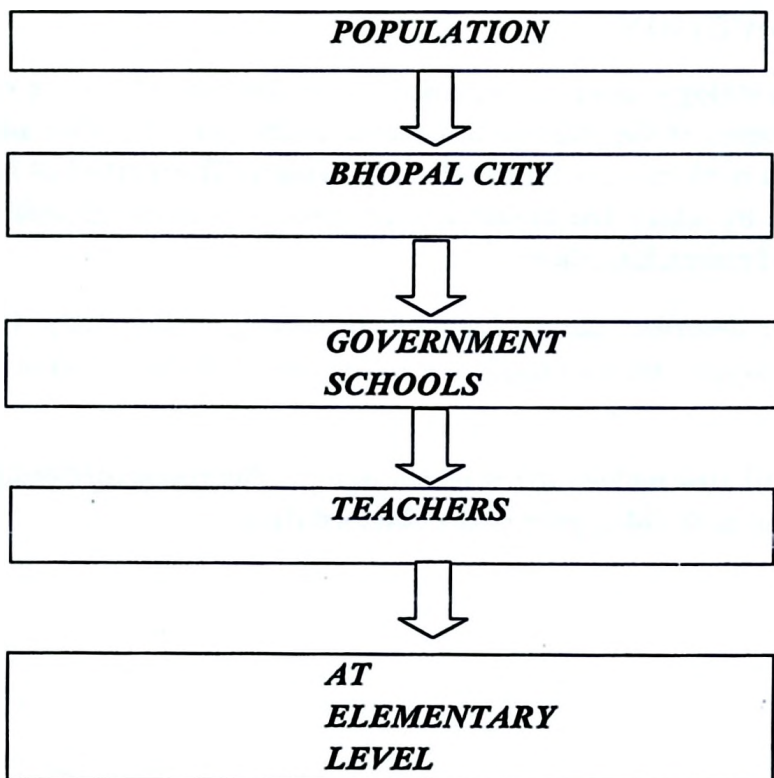

Research methodology involves systematic procedure by which the researcher starts from the initial identification of the problem to its conclusion. The role of the methodology is to carry on the researcher's work in a scientific and valid manner. The method of research provides the tools and techniques by which the problem is analyzed in a thorough manner. The researcher must know the use of research methods.

Present chapter describes the methodological aspects of the study. It elaborates the sampling technique employed, the tool used, source of data and its collection and statistical technique used.

The chapter will also include the research design. The researcher design is the detailed plan of the investigation or the blue print of the obtained data.

3.2.0 POPULATION

Population of the study is government school teachers at elementary level of Bhopal city.

3.3.0 VARIABLES OF THE STUDY

3.3.1 Independent variables

The independent variables of the present study are the Awareness and Attitude.

3.3.2 Dependent variable

In the present study, the dependent variable is Teacher at elementary level.

3.4.0 THE SAMPLE

Simple random sampling technique is used in the selection of sample. Total sample of 25 school teachers of four government schools at elementary level of Bhopal city.

3.5.0 TOOLS

Tools and techniques in research are the statistical methods of collection, analysis, interpretation, presentation, and organization of data. Statistics provides numerous tools and techniques to analyze the data and interpret the results of the analysis.

Research tools used for the data collection largely influences nature of findings. Keeping the importance of tool in research, researcher used self-constructed tool in the study. Researcher developed and used one tool that is questionnaire which contained 35 items on RPWD Act with multiples choices to assess the awareness and attitudes of respondents towards RPWD Act.

3.5.1 ADMINISTRATION OF THE TOOLS

Researcher has gone to different government schools of Bhopal city and over the tool-questionnaire to teachers and added to fill the tool. After the questionnaire was fully filled by teachers researcher collected the tools.

3.6.0 STATISTICAL PROCEDURES

Researcher used simple and statistical technique to analysis and interpret the data. The data were analysed by using percentage technique.
