STATUS OF VOCATIONAL EDUCATION:

Statement	Agree	Disagree	Neutral
In our country vocational education is perceived only as an option for students from the lower strata of society.			
Vocational education is treated as the last choice of parents and students.			
Students are less attracted toward vocational education because of its low pay band as compared to other occupation.			
In our country it is considered that vocational courses are only for students who are not good in general education			
Lack of awareness among parents and students about vocational courses make these courses less attractive towards students.			
School is also somewhere responsible for lack of awareness among students toward vocational education.			
Vocational education and training system is not responding to the needs of the labour market			

Economic opportunities of vocational education:

Statement	Agree	Disagree	Neutral
Vocational education at secondary stage help students to prepare for different vocations immediately after school			
Vocational education improves students employability skills.			
Vocational courses give training to students for a large number of blue collar jobs.			
Vocational education bridge the gap between education and employment.			
Parents occupation influence career choice of students.			
The shortage of skilled workforce has led to increase in number of unemployment labour in the country.			

One of the reason behind less enrollment in vocational courses is that there is no definite path for vocational students to move from one level to another level or we can say mobility is not defined.			
If enrollment in vocational institutes increases it will be helpful for declination of unemployability of country.			
People have negative perception about vocational courses and this is the reason students don't want to enroll themselves in these courses.			
Enrollment in vocational courses at senior secondary level is very low because of vocational guidance.			

Enrollment in vocational education

CHALLENGES FOR VOCATIONAL EDUCATION:			
Statement	Agree	Disagree	Neutral
The greatest challenge in Indian education system today is to provide skill based education to youth.			
There is a lack of participation by private players in the field of vocational education.			
At present vocational system does not put much emphasis on the academic skills resulting in lower incidences of vertical mobility.			
There is need of introducing few courses devoted to certain skills training at the primary and secondary level in all schools.			
Vocational education institute is difficult and costly to establish as compared to general education institutes.			
There is need to reducing gap between general education institutes and vocational education institutes.			
The need of the hour is advanced vocational skills training ,which can be successfully imparted under various educational programmes.			
For the country like India to progress we need people for all kinds of jobs not just white collar employees working on computer in the convenience of air-conditioned offices.			

SOCIAL PERSPECTIVE ON VOCATIONAL EDUCATION:

Statement	Agree	Disagree	Neutral
At secondary stage of schooling vocational education should introduce.			
Occupation like electrician, mechanic wireman, plumber and beautician are considered worthy to you.			
Vocational education is necessary in modern world as every industry or company today is looking for skilled and efficient employees.			
Vocational education gives opportunity to students who are unable to cope with academic education.			
Vocational education is good for boys only girls should go for general education.			
Vocational courses are good for girls and boys should go for higher degrees.			
Vocational subjects at secondary level help students to know their potential.
